## Leaklog Crack + Registration Code

Leaklog is a refrigerant business management system. It allows you to create your own database to keep track of the refrigerants you use, the circuits, the assemblies and the inspections. The application is fully integrated with Sysco service bureau. Your service company can be easily created and you can assign it to a certain customer. Every customer can be associated with his own service branch. Inspectors can be added and assigned to your customers. The application provides detailed circuit logbooks and assembly records with parameters of interest. Full features:

- Create your own service company and assign it to a customer
- Include customers and repair locations
- Customers and repair locations can be added if you have more than one field of application
- Circuit logbooks and assembly records can be

---

created • Logbooks can be created with a specific refrigerant, or for all refrigerants • Logbook entries are automatically assigned to the correct circuit • Pressure, Temperature and Recovery can be added to your logbooks • Logbook entries are automatically assigned to the correct circuit • View and export to PDF or HTML documents • View the different jobs that your inspectors have • View the overall activity of the inspector and assign him to a certain inspection job • Repair locations are assigned to your customers by default. You can add them manually if you want • Create and assign your own inspectors • Generate bills • Export to PDF or HTML documents • View the different jobs that your inspectors have • View the overall activity of the inspector and assign him to a certain inspection job • Assign repair locations to your customers by default. You can add them manually if you want • Assign inspectors to your

---

customers and monitor their activity • View detailed circuit logbooks and assembly records • Export to PDF or HTML documents • View the different jobs that your inspectors have • View the overall activity of the inspector and assign him to a certain inspection job • View circuit information and circuit logbooks, including all parameters of interest • View all the levels of your company and their respective values • View the service invoices, repairs and inspections • Add leak locations by serial number, manufacturer or type of leakage • Keep track of the recovered refrigerant • View the logbooks of the service bureaus, and assign the inspector to a job • Repair locations can be added if you have more than one field of application • View the service invoices, repairs and inspections • Display

**What's New In Leaklog?**

---

Leaklog is an industrial refrigerant management software solution that enables you to manage your service company and keep track of customers, inspections and repairs. The applications can range from commercial refrigeration, air conditioning and heat pumps, all the way to industrial and transport refrigeration. You can monitor every type of leakage and view a table detailing the total amounts for every category. The application also enables you to add and manage inspectors, along with their email address, phone number and their total number of inspections and repairs. They can be assigned to various inspection jobs and you can keep track of their overall activity. The inspection logbooks contain vast amounts of parameters and information that is observed during the examination. You can keep records of the pressures, temperatures, refrigerant recoveries and assembly record numbers. All the data

---

is contained into tables and it can be easily exported to PDF files or HTML documents. Leaklog is a useful and fully-featured application that can greatly improve the way you keep track of your refrigerant business. Thanks to the intuitive user interface and easy-to-use commands, it can be handled by anyone with basic computer skills and it does not hog your system's resources. It is worth noting that the application works in accordance with Regulation (EC) No 842/2006. Leaklog Price: Free Download Leaklog from the relevant link at the bottom of the page. Leaklog FAQ: 1. Can Leaklog be used on Mac or Linux? No. Leaklog is currently not compatible with Mac or Linux. We are working to expand its applicability to other platforms as soon as possible. 2. Do I need to create a new account? Yes. When you create a new installation you are required to create an account. After creating the account you can use it

---

with other applications, etc. 3. What is the cost of the Leaklog Licence? You can use Leaklog for free during your trial period. If you want to continue using it after the trial period is over, you can purchase it from our website. If you choose to make a donation you will receive a 30% discount. 4.
