Sometimes I don't really think about what came before, just how great it still is. Even when I was pretty young I liked the game, but I remember that the first time I played through I got really frustrated when I unlocked a new character and realized that I couldn't play any new characters (there were other ways of unlocking them, but those were awkward for a kid). I'd definitely recommend it, even if you're not a fan of the series. I generally like classic games better, so I can't really compare, but I do enjoy the story and atmosphere so much. I have that feature on all my games, and I like it. You're right to call the argument against the ending around "griefing", but you have to be careful about that, because g "you're awesome" will trigger it. There's a tutorial at the beginning that'll explain how to do it, and I'm sure I remember at least one way to avoid it. I'd probably still do it, though. It's not fully customizable (certain characters have their own voices, and there's no option for a custom character), but 3e33713323
