Achievement System
Easy, Simple, Normal and Hard difficulty levels
Game Center, Facebook and Twitter integration

Q: Reversing a series of directories in sed I have the following series of lines in a file. What I need to do is to reverse all the directories such that the first one is the last one. C:/foo/bar/1.1.1.1.jpg C:/foo/baz/1.2.1.3.png C:/apple/dog/4.4.4.4.png What I would expect from the output is C:/baz/1.2.1.3.png C:/bar/1.1.1.1.jpg C:/dog/4.4.4.4.png C:/apple/dog/4.4.4.4.png If I have to use sed, how can I do it? I know how to do it with one directory: sed -i '/^Directory:/{s!.*Directory: \(.*\)\$!!}./file.txt However I am not able to see how to do this in a series of directories. A: with an external script: #!/bin/bash source./file.txt I.e., source the file from there, not in sed... If you need multi-threading, multiple instances of source, #!/bin/bash source./file.txt threads=\${#input+1} chunk_size=\${1%/} echo "starting \${threads} threads..." for ((i=1; i
